

## Using a pushbutton enables accurately detecting difficult-to-detect objects.

- Conforms to standards for semiconductor FOUP cassettes to enable accurately detecting FOUP cassettes without being affected by the material, color, or reflectance of the bottoms of the cassettes.
- Thin design enables mounting in a wider range of applications, e.g., on transfer arms.
- Increased visibility with 4-direction indicator.
- Optical detection of actuator operation provides a long life (mechanical life: 5 million operations min.).
- Models available with PNP or NPN output.
- Models are available with very flexible robot cable.

 Be sure to read *Safety Precautions* on page 5.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

## Ordering Information

### List of Models

Appearance	Sensing distance	Sensing method	Operation mode	Cable length	Model	
					NPN output	PNP output
	(See note 2.) 0 to 3.5 mm (pressed position) (See note 1.)	Pushbutton	ON with no load	1 m	EE-SA801A 1M	EE-SA801R 1M
			OFF with no load	1 m (robot cable)	EE-SA801A-R 1M	EE-SA801R-R 1M
					EE-SA701-R 1M	EE-SA701P-R 1M

Note: 1. Distance from the top surface of the housing to the top of the actuator.  
 2. Output reverses between 3.5 and 4.5 mm.

Ratings and Specifications

Item	Model	NPN output	EE-SA801A	EE-SA801A-R	EE-SA701-R
		PNP output	EE-SA801R	EE-SA801R-R	EE-SA701P-R
Indicator		Light red when actuator is pressed.			Lit red while there is no load on actuator
Operation Specifications (See	Free position (FP)	5.0±0.4 mm			
	Operating position (OP)	3.5 to 4.5 mm (See note 2.)			
	Total travel position (TTP)	0 mm max.			
Operating load (See note 3.)		3 N max. (typical: 0.5 N)			
Supply voltage		12 to 24 VDC±10%, ripple (p-p): 10% max.			
Current consumption		35 mA max.			
Control output		NPN Models: NPN open collector, 5 to 24 VDC, 50 mA max.; residual voltage of 0.4 V max. at 50-mA load current OFF current: 0.5 mA max. PNP Models: PNP open collector, 5 to 24 VDC, 50 mA max.; residual voltage of 0.4 V max. at 50-mA load current OFF current: 0.5 mA max.			
External diagnosis input	Input	NPN Models Emission OFF: Shorted to 0 V or 0.5 V max. (source current: 30 mA max.) Emission ON: Open (leakage current: 0.4 mA max.) PNP Models Emission OFF: Shorted to +DC or +DC-0.5 V max. (sink current: 30 mA max.) Emission ON: Open (leakage current: 0.4 mA max.)			
	Response time	1 ms max.			
Protection circuits		Reversed power supply polarity protection			
Ambient temperature range		Operating: -25 to +55°C Storage: -30 to +60°C (with no icing or condensation)			
Ambient humidity range		Operating: 5% to 85% Storage: 5% to 95% (with no condensation)			
Mechanical durability		5,000,000 operations min. (One operation is from the free position to operating position and back to the free position.)			
Vibration resistance		Destruction: 10 to 500 Hz, 1.0-mm single amplitude or 150 m/s <sup>2</sup> 3 times each in X, Y, and Z directions for 11 min. each			
Shock resistance		Destruction: 500 m/s <sup>2</sup> for 3 times each in X, Y, and Z directions			
Degree of protection		IEC IP40			
Connecting method		Pre-wired (standard cable length: 1 m)	Pre-wired (robot cable length: 1 m)		
Weight		Approx. 16.1 g			
Material	Case	Polycarbonate			
	Actuator	Polyacetal			
Accessories		Instruction Manual			

Note: 1. Free position (FP): The position of the top of the actuator when no force is being applied to the actuator.  
 Operating position (OP): The position of the top of the actuator when the actuator is pressed and the output transistor changes from OFF to ON for the EE-SA701-R/-SA701P-R and from ON to OFF for all other models.  
 Total travel position (TTP): The position of the top of the actuator when the actuator is pressed as far as it can be pressed.

- This does not indicate that the output will be ON from 3.5 to 4.5 mm, but rather that the output will change from ON to OFF at some point between 3.5 and 4.5 mm.
- The force required to press the actuator from the FP to the OP.

I/O Circuit Diagrams

Model	Operating Mode	Timing chart	Output circuit
EE-SA801A EE-SA801A-R	ON with no load		
EE-SA701-R	OFF with no load		
EE-SA801R EE-SA801R-R	ON with no load		
EE-SA701P-R	OFF with no load		

## Operating Principles

This is a pushbutton-type sensor. An emitter (GaAs infrared LED) and receiver (Si photo IC) are positioned across from each other inside the sensor and light is received when there is no sensing object. When the sensing object presses the actuator, the light path between the emitter and receiver is broken so that the receiver no longer receives light.

This Sensor provides an external diagnosis function and stability checking function.

### (1) External Diagnosis Function

The light emission from the LED can be stopped by using the following circuit configuration. This enables checking the operation of the receiver by turning the LED ON and OFF when there is no load.

EE-SA801A/-SA-801A-R/-SA701-R

EE-SA801R/-SA-801R-R/-SA701P-R

### (2) Stability Checking Function

The light intensity emitted by the LED can be reduced by 20% by using the following circuit configuration. By doing so, the light reception operation at 80% light intensity with no sensing object (same as 100%, i.e., the output transistor should turn ON) can be tested in advance to check for malfunctions caused by deterioration of LED light intensity.

EE-SA801A/-SA-801A-R/-SA701-R

EE-SA801R/-SA-801R-R/-SA701P-R

### (3) Using Both Functions Simultaneously

Use the following circuit configuration when both the external diagnosis function (Sig1) and the stability checking function (Sig2) are required.

EE-SA801A/-SA-801A-R/-SA701-R

EE-SA801R/-SA-801R-R/-SA701P-R

Note: Use a transistor that is capable of switching 50 mA at 10 V.  
The resistor must have a power rating of 1/8 W min.

## Safety Precautions

Refer to *Warranty and Limitations of Liability*.

**⚠ WARNING**

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

**Precautions for Correct Use**

Make sure that the Photomicrosensor is used within the rated ambient environment conditions.

● **Mounting**

Mount the Photomicrosensor securely on a flat surface using M3 pan head screws, and tighten the mounting screws using a tightening force of 0.59 N·m max.

**Adjustment**

The EE-SA801 requires 10 ms to be in stable operation after power is supplied. If separate power supplies are used for the EE-SA801 and load, be sure to supply power to the EE-SA801 before supplying power to the load.

**Operating Environment**

- The EE-SA801 is not watertight. Do not use the EE-SA801 outdoors.
- Do not use the EE-SA801 in places where water, oil, or chemical may be sprayed onto the EE-SA801. The exterior coverings of the EE-SA801 are made of polycarbonate. Keep the coverings away from any alkaline, aromatic hydrocarbon, or aliphatic chloride hydrocarbon solvents, all of which will damage the coverings.

(Unit: mm)

## Dimensions

Tolerance class IT16 applies to dimensions in this datasheet unless otherwise specified.

## Terms and Conditions Agreement

### Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

### Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <http://www.omron.com/global/> or contact your Omron representative for published information.

### Limitation on Liability: Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

### Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

### Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

### Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

### Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

### Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
