## ■ Accessories Required for Connecting the PS-□S(R) and Electrodes (Order Separately)

### Electrodes Shorter than 1 m

The following items are required for each pole.

- 1 × F03-01 Electrode
- 1 × F03-03 Lock Nut

The Electrode can be cut anywhere based on the control level.

### Electrode Longer than 1 m

The following items are required for every additional meter of electrode for each pole.

- 1 × F03-01 Electrode
- 1 × F03-02 Connecting Nut
- 2 × F03-03 Lock Nuts

Use F03-14 1P, 3P, and 5P Separators to prevent the electrodes from touching each another.

# Level Controller Installation

## ■ Attaching Electrodes to the Electrode Holder

### Appearance

### 1. Removing the cover

1. Wedge a flat-blade screwdriver into the groove on either side of the rubber bushing and lever it off alternately. (The cover may break if you lever it too much on one side.)

2. Undo the two set screws and lift off the electrode section.

### 2. Mounting

1. Screw the Electrode Holder into the coupling (54 dia.) secured at the installation location.

2. Screw in the electrodes until it cannot be turned any further, tighten the lock nut, and then secure them with the clamp screws (M3.5).

3. Attach the electrode section to the Electrode Holder.

(Secure with the two case mounting screws. Tightening torque 0.7 N·m)

4. The rubber bushing can be cut with a utility knife if the hole size requires adjustment to fit the cables.

5. Connect the leads to the respective terminals. (Fit the rubber bushing in position as shown in the diagram below.)

6. Put the claw at the back of the cover into the hole at the back of the electrode section housing and push it close until you hear a click.

## ■ Installing an Electrode Holder on a Tank

**Note:** Electrode Holders should always be installed from above the tank.

### Method 1

Fabricate screw threads of the same size as PF2 in the tank.

### Method 2

Use a commercially available coupling (PF2 parallel thread (effective dia.: 58.135) JIS B0202).

### Method 3

Drill a hole (65 dia.) in the tank and insert the Electrode Holder. Use an F03-12 Frame (sold separately) as a nut from below and secure in place.

### Method 4

Use the F03-12 Frame (sold separately) as a flange.

1. Drill a hole in the tank.
2. Attach the Frame over the hole.  
(Tighten the four F03-12 mounting screws.)

### Method 5

Use F03-12 and F03-13 Frames (both sold separately) together and embed them in the concrete.

## ■ Mounting the F03-11 Protective Cover (Sold Separately)

The protective cover can only be used for methods 4 and 5 described in the previous section.

### PS-□S(R) Series

Attach the F03-12 Frame to the bottom of the PS-series Electrode Holder. (See diagram below.)

Next, place the F03-11 Protective Cover on top of the Electrode Holder and press on it until it clicks into place.

**Note:** The cap screw attached to the protective cover is not required for mounting.

### BF-series Electrode Holder (Applicable to BF-3(R), -5(R))

Remove the two mounting screws (M5 × 25) of the BF-series Electrode Holder and attach the two cap screws (M5 × 25) provided with the F03-11 Protective Cover.

Next, put the Protective Cover over the top of the BF-series Electrode Holder, and then tighten the two enclosed screws (M3 × 20 with washers). See diagram below.

**Note:** The Protective Cover cannot be mounted on the BF-1.
